Live Greener!

It is not impossible to *live green!* You might need to adjust certain things that you do, but in the end living a *greener* lifestyle will benefit you. Here is an easy step to a new *eco-friendly* home, add houseplants! Aside from cleaning the air of your apartment, having your own personal green space can be a godsend when you're trying to make your home seem less like the office.

Nick's Maintenance Tip of the Month

AMLI at Bryan Place's Maintenance staff is top notch! Did you know that you should be changing your air filters every 30 days when running the air conditioner, and every 60 days when running the heat? This will minimize on dust collection in your home, and reduce your electric bill. It's best to set a routine, put a work order in for the filters to be changed when you turn in your rent check.

February is American Heart Month

Take initiative to leading a healthier lifestyle! Try eating lean meats, cutting your portions back, drinking fat free or 1% milk and watch your sodium intake. Know the signs and symptoms and exercise regularly. We've got a 24 hour fitness center and yoga studio so start your heart healthy lifestyle with us!

This will be the hot spot to watch the game this year.
